Page layout

Definition

Page's layout is the art of manipulating the user's attention on a page to convey meaning, sequence, and points of interaction.

Five elements of page layout

- Visual hierarchy
- Visual flow
- Grouping and alignment
- Dynamic Displays
- Integration of these elements

Patterns

- Visual framework
- Center stage
- Titled sections
- Card stack
- Collapsible panels
- Movable panels

Sides navigation

Based around four questions:

- Where am I now?
- Where do I want to go?
- How do I get there?
- Am I there yet?

Signposts

They are features that help users figure out their immediate surroundings.

Way finding

Is what people do as they find their way towards their goals.

Way finding and the structure of a system are dependent on each other.

Navigation models

- Modal Panel
- Clear entry points
- Bookmarks
- Escape hatch

Input from the user

Control choice

Controls for selecting one of N items:
