

Web Application Analysis

Brighthouse

- User-centered design: Three clearly defined user profiles (admin / staff / families)
- Behavioral patterns: Instant gratification (quick check-in), Safe exploration (error correction), Streamlined repetition (quick scan), Habituation (consistent interface)

Information Organization

Implemented patterns:

- Dashboard: Central panel
- Two panel selector: List + details
- Wizard: Guided setup by step check in process
- Metaphor: Control panel + Mobile-first idiom
- Structure: One window drilldown, responsive

Page layout - applied elements:

- Visual hierarchy: Upper-left preference, Center stage, Titled sections
- Gestalt: Proximity (grouped features), Similarity (consistent icons), Continuity (vertical flow)
- Patterns: Responsive Disclosure (7-step form), collapsible panels (FAQs), Grid of Equals (features)
- Colors: Consistent visual FW (purple / white)

Complex data - presentation:

Models: Tabular (reports), Linear (timeline), Hierarchical (classrooms → students), Dashboards (ratios)

Preattentive variables: Color (green = OK, red = alert), Size (large metrics), Position (alerts on top)

Navigation: Filtering, drill-down, export

Meaning: Clear labels, data tips, real-time updates.
